Clinical Experience with BIOTRONIK's Differentiating Technology

Thursday, July 29, 2021

6:00 p.m. - 6:20 p.m in Eastern Standard Time

When German Engineering, Swiss Precision and American Ingenuity work together to change lives, it is anything but ordinary. Join our experts to discover the latest advancements in rhythm management and gain valuable insights through educational opportunities.

During his presentation, **Dr. Asad Mohammad** will share his experience using BIOMONITOR ILLm Insertable Cardiac Monitor (ICM) and explain how its rhythm fidelity, industry-leading longevity and detection accuracy should guide the use of ICMs in the treatment of cardiac arrhythmia patients. Please join us to learn more about how BIOMONITOR ILLm powered by its breakthrough RhythmCheck algorithm eliminates inappropriate false positive AF detection and identifies atrial fibrillation in cryptogenic stroke patients.

In his talk, **Dr. Ryan Cunnane** will provide clinical highlights of the BIOTRONIK DX technology and findings from recently published clinical trials. He will also share best practices on how DX technology can reduce risk and related complexities of lead management ultimately leading to better patient care. Please join us to discover the numerous practical advantages of the DX technology.
